

ALEXANDER BESSMELCEV

MIDDLE+/SENIOR FRONTEND ENGINEER

Telegram: @Alex_Sage
Email: alexbessmelcev@gmail.com
Portfolio: alex-bes.vercel.app
LinkedIn: alex-bessmelcev

Novosibirsk, Russia · Open to relocation · Remote

SKILLS

CORE FRONTEND

Vue.js (2 & 3), Nuxt.js (3),
React.js, Next.js, TypeScript,
JavaScript (ES6+), Three.js,
HTML5, CSS3, SCSS, Tailwind
CSS, Bootstrap, BEM

ARCHITECTURE & DATA

Frontend Architecture,
Component-Driven
Development, WebSockets,
REST API, State Management
(Pinia, Vuex), OOP, Performance
Tuning (Web Vitals), Redis
(familiar)

BUILD & WORKFLOW

Vite, Webpack, Git, Storybook,
Figma Design System, CI/CD,
Agile/Scrum

TESTING & QUALITY

Vitest, Playwright, Jest, Code
Reviews, Accessibility (WCAG),
Unit/E2E Testing

AI-ASSISTED DEVELOPMENT

Advanced LLM workflows
(Claude, Gemini) for architecture
validation, deep refactoring,
automated debugging, rapid
technical research, and test
generation

SOFT SKILLS

Tech Leadership, Mentoring,
Cross-functional Collaboration,
Product Mindset, Comprehensive
Code Reviews, Excellent
Communication (English B2)

PROFESSIONAL SUMMARY

I'm a Frontend Engineer with 6 years of commercial experience. I mainly work with Vue and TypeScript, but I also have real-world experience with React, so I can easily adapt to different tech stacks and project needs.

I have worked on large products, including migrating applications from Vue 2 to Vue 3, building component systems based on Figma designs, and improving loading and rendering performance to keep interfaces fast even under high load. I enjoy working in a team with close communication between developers, designers, product managers, and backend engineers. I believe this helps us build the right solutions and avoid unnecessary rework.

I'm open to remote work and relocation. For me, the most important thing is to work on a project where quality, good architecture, and teamwork are valued.

WORK HISTORY

Frontend Engineer (Middle+ / Senior)

emcd.io (Singapore/ Remote)

Feb 2024 – Aug 2026

Stack: Vue 3, Nuxt 3, TypeScript, Pinia, WebSockets, Storybook, Vite, Webpack, Git

- Architected and delivered the core customer-facing interface for a high-traffic P2P cryptocurrency marketplace, including ad listings, real-time chat, deal flows, and user profiles - directly impacting user engagement and transactional conversion.
- Successfully led the migration of a major enterprise application from Vue 2 (Options API) to Vue 3 (Composition API) and Nuxt 3 with full TypeScript coverage, reducing codebase size by 25% and accelerating feature time-to-market by 30%.
- Engineered a scalable, enterprise-grade UI Component Library documented via Storybook and mapped 1:1 to Figma, boosting cross-team development velocity by 40%.
- Developed a B2B enterprise dashboard featuring high-performance analytical modules, real-time reporting, and an advanced user management system.
- Integrated REST APIs and WebSockets to achieve sub-100ms low-latency real-time data synchronisation for thousands of concurrent users.
- Collaborated closely with the Tech Lead on architectural decisions, evaluating new web technologies and establishing robust frontend guidelines.
- Enforced end-to-end quality through code reviews, mentoring junior/mid-level developers, and implementing testing strategies to ensure reliable releases.
- Integrated LLMs (Claude & Gemini) into the daily engineering workflow, accelerating complex refactoring, automated debugging, and rapid technical research.

EDUCATION

Siberian State University of Telecommunications & Informatics

Bachelor's Degree in Information Systems & Technologies in Media Industry

NSU Higher College of Informatics

Associate's Degree in Programming & Information Systems

LANGUAGES

Russian: Native

English : B2 (Upper-Intermediate)

ADDITIONAL INTERESTS

Photography: I take photos with my beloved Fujifilm X-T20.

Traveling: I try to see more to broaden my horizons.

Video Games: I enjoy playing both story-driven and online projects.

Contract Frontend Engineer

WSender (Novosibirsk, Russia)

Sep 2023 – Dec 2023

Stack: React, Next.js, TypeScript, Three.js, JavaScript, HTML5, CSS3/SCSS, Figma.

- Architected the foundational frontend boilerplate and project structure for a new SaaS product using Next.js, React, and TypeScript, with strict ESLint/Prettier rules for production-grade code cleanliness.
- Developed an interactive 3D product showcase using Three.js and custom scroll-driven animations, improving user engagement and time-on-site by 45%.
- Delivered pixel-perfect, highly responsive adaptive layouts based on complex Figma specifications with full cross-browser compatibility in a fast-paced agency environment.

Contract Frontend Engineer

Anketolog (Novosibirsk, Russia)

Jul 2023 – Sep 2023

Stack: Vue.js, Nuxt.js, JavaScript, REST API, Scrum.

- Designed the application logic and frontend structure for a high-load, data-heavy survey platform, leveraging Nuxt 3 to implement robust Server-Side Rendering (SSR) and optimise SEO metrics.
- Delivered 100% accessible (WCAG-compliant) UI layouts by integrating semantic HTML and complex ARIA attributes, significantly expanding audience outreach and demonstrating a strong commitment to inclusivity.
- Collaborated within an agile Scrum environment to streamline product support cycles and rapidly deliver iterative, high-quality improvements.

Frontend Engineer (Middle)

Tensor (Novosibirsk, Russia)

Aug 2022 – Jun 2023

Stack: React.js, TypeScript, JavaScript, Git, REST API.

- Shipped scalable, modular UI solutions for complex enterprise-level ERP software and reporting modules.
- Developed fault-tolerant, state-managed UI components using React and TypeScript to interact efficiently with heavy data layers, decreasing browser memory consumption by 20%.
- Significantly reduced technical debt in legacy codebases, accelerating subsequent modular feature integrations by 15%.

Frontend Engineer (Junior+ / Middle)

Crypton Studio (Tomsk, Russia)

May 2021 – Jun 2022

Stack: Vue 3, TypeScript, Nuxt.js, Web3.js, Ethers.js, REST API.

- Participated in architecting a new Web3-decentralised product (WorkQuest platform) from scratch in an agile agency setting.
- Programmed secure and responsive Web3 frontend layers for seamless user interaction with smart contracts and decentralised providers (Ethers.js, Web3.js).
- Optimised dApp global state management and implemented resilient error-handling logic for blockchain transactions, lifting successful checkout rates by 18%.

Full-Stack Engineer (Junior)

Chrono (Novosibirsk, Russia)

Sep 2019 – May 2021

Stack: PHP, JavaScript, jQuery, MySQL, NetCat CMS, Bootstrap, Git.

- Created high-end interactive UI environments, including a custom canvas-based 3D product visualiser and complex scroll-driven UI animations.
- Integrated third-party logistics and social platforms (DHL, VK APIs) to automate fulfilment tracking flows.
- Maintained backend modules and database queries (MySQL) within the NetCat CMS framework architecture.
